Greey|Pickett is an award-winning landscape architecture and land planning firm comprised of artists, designers, visionary thinkers and implementers. At Greey|Pickett we are artistic problem solvers. Our greatest strength is our ability to fuse innovative design concepts and creative aesthetic elements that exceed client expectation and leave lasting impressions. Our collaborative approach to design allows for diversity that ranges from traditional, formal gardens to modern and minimalist landscapes.

Greey|Pickett was established in 1998 by Russell Greey, R.L.A. and Wendell Pickett. Together, along with the Greey|Pickett team, we implement timeless holistic designs, so that every project represents a unified vision. Russell Greey was named Phoenix Home & Garden "Master of the Southwest" in 2016 and has had the honor of multiple residential designs being selected for the Phoenix Home & Garden annual Home & Garden Tour.
